CLAIM AMENDMENTS
CLEAN FORM

Please **AMEND** the claims as follow:

33.   (AMENDED) A method for controlling performance of a supplementary process at a point-of-sale terminal, comprising:

        receiving an override signal; and

        if the override signal indicates performance of a supplemental process,

            determining an upsell in dependence on a purchase,

            determining an upsell price in dependence on the purchase, and

            offering to exchange the upsell price for the upsell.

34.   (AMENDED) An apparatus for controlling performance of a supplementary process at a point-of-sale terminal, comprising:

    a storage device; and

        a processor connected to the storage device,

        the storage device storing a program for controlling the processor; and

        the processor operative with the program to:

            receive an override signal; and

        if the override signal indicates performance of a supplemental process,

            determine an upsell in dependence on a purchase,

            determine an upsell price in dependence on the purchase, and

            offer to exchange the upsell price for the upsell.

35.   (AMENDED) A method for controlling performance of a supplementary process at a point-of-sale terminal, comprising:

        measuring an activity rate of a point-of-sale terminal; and

        if the activity rate is below a first predetermined threshold, offering a first upsell having an first offer speed; and

        if the activity rate is above a second predetermined threshold, offering a second upsell having a second offer speed greater than the first offer speed.
